SUBJECT INDEX

A

Angina Pectoris, long range care in cases of myocardial infarction and, xv, 7.

Anginal attacks induced by exercise, electrocardiogram of, xv, 4.

Anoxemia test as an aid in the diagnosis of coronary insufficiency, xv, 4.

Anticoagulant therapy, xv, 11.

B

Backward failure theory of congestive heart disease, xvi, 11.

C

Cardiac output, relation of, to the symptoms and signs of congestive heart failure, xvi, 12.

Cardiovascular system, effect of smoking tobacco on, xiv, 4; xiv, 5.

Care, long range, in cases of myocardial infarction and angina pectoris, xv, 7.

Chemical change in the myocardium in diseases involving the heart, xiii, 6.

Chemotherapy in subacute bacterial endocarditis, xiii, 1.

Circulation times, value of, xvi, 8.

Coarctation of aorta, surgical treatment for, xvi, 2.

Collateral circulation of the human heart, xv, 10.

Congenital heart disease, venous catheterization in, xvi, 4.

Constrictive pericarditis, chronic: results of partial pericardiectomy and epicardiolysis in 34 cases, xvi, 5.

Coronary artery insufficiency, clinical recognition of, xv, 3.

Coronary circulation, recent advances in the physiology of, xiii, 4.

Coronary insufficiency, anoxemia test as an aid in the diagnosis of, xv, 4.

Coronary occlusion, acute, functional consequences of, xv, 5.

Coronary system, influence of extrinsic factors on, xiii, 10.

Coronary thrombosis, treatment of, xv, 6.

D

Digitalis glycosides, treatment of cardiac failure with, xiv, 11.

Digitalis intoxication, xiv, 12.

Digitalis, pharmacodynamics of, in congestive heart failure, xiv, 10.

Dyspnea, xiii, 3.

E

Electrocardiogram—Clinical significance of precordial leads in diagnosis of heart disease, xv, 1; xv, 2.

Electrocardiogram, genesis of the, xiii, 5.

Electrocardiogram of anginal attacks induced by exercise, xv, 4.

Epidemiology of rheumatic fever, some recent advances in study of, xiii, 7.

Erythematous Lupus (Lupus Erythematosus), xiii, 8.

Exercise, anginal attacks induced by, electrocardiogram of, xv, 4.

H

Heart disease, rest, bed rest, xiv, 3.

Heart failure, xiv, 8; xiv, 9.

Heart failure, congestive, role of administration of salt and water in treatment of, xvi, 10.

Heart failure, congestive, backward failure theory of, xvi, 11.

Heart failure, pharmacodynamics of digitalis in, xiv, 10.

Heart failure, congestive, relation of the cardiac output to the symptoms and signs of, xvi, 12.

Heart (cardiac) failure, treatment with digitalis glycosides, xiv, 11.

Heart, human, collateral circulation of, xv, 10.

Heart in shock, xvi, 9.

Hypertension, as viewed from its surgical treatment, xiii, 12; xiv, 1.

I

Immersion foot, xiii, 2.

L

Lupus Erythematosus (Erythematous Lupus), xiii, 8.

M

Measurements, heart, by x-rays, xvi, 7.

Myocardial infarction and angina pectoris, the long-range care in cases of, xv, 7.

Myocardial injury, electrocardiographic findings in the presence of, xvi, 6.

Myocardium, chemical changes in, in diseases involving the heart, xiii, 6.

N

Nonspecific pericarditis, acute, xvi, 3.

P

Patent ductus arteriosus, recent advances in surgical treatment of, xvi, 1.

Patent ductus arteriosus, surgical treatment of, xiv, 2.

Penicillin, in the treatment of subacute bacterial endocarditis due to streptococcus viridans, xiii, 11.

Pericarditis, acute nonspecific, xvi, 3.

Pericarditis, chronic constrictive, results of partial pericardiectomy and epicardiolysis in 34 cases, xvi, 5.

Physiology of the coronary circulation, recent advances in, xiii, 4.

Precordial leads, clinical significance of, in the diagnosis of heart disease, xv, 1; xv, 2.

R

Rest, bed rest, and heart disease, xiv, 3.

Rheumatic fever, some recent advances in study of epidemiology of, xiii, 7.

Rheumatic fever, treatment of, xiv, 6; xiv, 7.

S

Salt and water, role of administration in treatment of congestive heart failure, xvi, 10.

Shock, participation of the heart in, xvi, 9.

Smoking tobacco, the effect of, on the cardiovascular system, xiv, 4.

Subacute bacterial endocarditis, due to streptococcus viridans, use of penicillin in treatment of, xiii, 11.

Subacute bacterial endocarditis, chemotherapy in, xiii, 1.

Subacute bacterial endocarditis, treatment of, xv, 8.

T

Therapy, anticoagulant, xv, 11.

Thrombo-angitis obliterans, xiii, 9.

Tobacco, effect of smoking on the cardiovascular system, xiv, 4; xiv, 5.

Treatment of congestive heart failure, role of salt and water administration, xvi, 10.

Treatment of coronary thrombosis, xv, 6.

Treatment of rheumatic fever, xiv, 6; xiv, 7.

Treatment of subacute bacterial endocarditis, xv, 8.

Treatment, surgical, for coarctation of aorta, xvi, 2.

Treatment, surgical, hypertension, xiii, 12; xiv, 1.

Treatment, surgical, patent ductus arteriosus, xiv, 2.

Treatment, surgical, patent ductus arteriosus, recent advances in, xiv, 1.

Trench foot, the late phase of, vascular injuries due to cold with particular reference to, xv, 9.

V

Vascular diseases, diffuse, xv, 12.

Vascular injuries due to cold, with particular reference to the late phase of trench foot, xv, 9.

Venous catheterization in congenital heart disease, xvi, 4.

X

X-Rays, measurements of heart by, xvi, 7.
